Re: Letter of Recognition for *CL-Out*®

Dear Mr. Scuilla:

The U.S. Environmental Protection Agency applauds Osprey Biotechnics for your environmental leadership in developing *CL-Out*®. EPA's Design for the Environment ("DfE") program seeks to promote the use of soil and ground water bioremediation products with improved environmental and human health characteristics. *CL-Out*® fully achieves that objective in the environmental remediation sector.

The key purpose of the DfE-Osprey Biotechnics partnership is to recognize and encourage the environmentally preferable chemistry of *CL-Out*®. DfE is very enthusiastic about Osprey Biotechnics's successful formulation of *CL-Out*® and about our partnership, the first involving a soil and ground water bioremediation product. By designing a product that degrades chlorinated solvents, hydrocarbons, and other organic chemicals, while substituting for treatment chemicals of concern, Osprey Biotechnics illustrates its active environmental stewardship and dedication to continuous improvement.

Environmental professionals that bioremediate soil and ground water with *CL-Out*® will be participating in this important national effort to protect the environment and safeguard human health. I commend Osprey Biotechnics for your commitment to improving the environmental profile and performance of your products—and for leading change in the industry. Much success with *CL-Out*®.

Sincerely,

A handwritten signature in green ink, appearing to read "Clive Davies".

Clive Davies, Chief
Design for the Environment
